R Markdown

- This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.
- When you click the **Knit** button a *document* will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
require(stats)
require(graphics)
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

```
plot(cars, xlab = "Speed (kmh)", ylab = "Distance (m)")
title(main="Car Stuff")
lines(lowess(cars$speed, cars$dist, f = 2/3, iter = 3), col = "purple")
```

Car Stuff

Including Plots

- You can also embed plots, for example:

- Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
